new/usr/src/cmd/zlogin/zlogin.c

4736 spamming zlogin with SIGINT will halt the target zone

unchanged portion omitted

```
549 /*
550 * Some signals (currently, SIGINT) must be forwarded on to the process
551 * group of the child process.
552 */
553 static void
554 sig_forward(int s)
555 {
556     if (child_pid != -1) {
557         (void) sigsend(P_PGID, child_pid, s);
558         pid_t pgid = getpgid(child_pid);
559         if (pgid != -1)
560             (void) sigsend(P_PGID, pgid, s);
561     }
562 }
```
