35 #
36 # DESCRIPTION:
37 # vdev retains asize when 2nd last mirror child is removed while autoexpand=off
38 #
39 #
40 # STRATEGY:
41 # 1) Create a pool
42 # 2) Create different sized volumes on top of the pool
43 # 3) Create pool with autoexpand=off using the zvols in a 2-way mirror
44 # 4) Detach the smaller of the 2 vdev's from the mirror
45 # 5) Ensure that smaller vdev can be re-attached
46 # 6) Detach the smaller vdev again to ensure no expand at import
47 # 7) Export pool
48 # 8) Import pool
49 # 9) Check that the pool size has not expanded
50 # 10) Ensure that smaller vdev can be re-attached
