32 SUNWORLD - link-editors development package.
33 -----
35 The SUNWORLD package is an internal development package containing the
36 link-editors and some related tools. All components live in the OSNET
37 source base, but not all components are delivered as part of the normal
38 OSNET consolidation. The intent of this package is to provide access
39 to new features/bugfixes before they become generally available.
41 General link-editor information can be found:
43   http://linkers.central/
44   http://linkers.sfbay/      (also known as linkers.eng)
46 Comments and Questions:
48   Contact Rod Evans, Ali Bahrami, and/or Seizo Sakurai.
50 Warnings:
52   The postremove script for this package employs /usr/sbin/static/mv,
53   and thus, besides the common core dependencies, this package also
54   has a dependency on the SUNWsutl package.
56 Patches:
58   If the patch has been made official, you'll find it in:
60     http://sunsolve.east/cgi/show.pl?target=patches/os-patches
```

```
62   If it hasn't been released, the patch will be in:
64     /net/sunsoftpatch/patches/temporary
66   Note, any patches logged here refer to the temporary ("T") name, as we
67   never know when they're made official, and although we try to keep all
68   patch information up-to-date the real status of any patch can be
69   determined from:
71     http://sunsoftpatch.eng
73   If it has been obsoleted, the patch will be in:
74     /net/on${RELEASE}-patch/on${RELEASE}/patches/${MACH}/obsolete
78 History:
80   Note, starting after Solaris 10, letter codes in parenthesis may
81   be found following the bug synopsis. Their meanings are as follows:
83     (D) A documentation change accompanies the implementation change.
84     (P) A packaging change accompanies the implementation change.
86   In all cases, see the implementation bug report for details.
88   The following bug fixes exist in the OSNET consolidation workspace
89   from which this package is created:

95 -----
96 4225937 i386 linker emits sparc specific warning messages
97 4215164 shf_order flag handling broken by fix for 4194028.
98 4215587 using ld and the -r option on solaris 7 with compiler option -xarch=v9
99 causes link errors.
100 4234657 103627-08 breaks purify 4.2 (plt padding should not be enabled for
101   32-bit)
102 4235241 dbx no longer gets dlclose notification.
103 -----
104 All the above changes are incorporated in the following patches:
105   Solaris/SunOS 5.7_sparc      patch 106950-05 (never released)
106   Solaris/SunOS 5.7_x86       patch 106951-05 (never released)
107   Solaris/SunOS 5.6_sparc      patch 107733-02 (never released)
108   Solaris/SunOS 5.6_x86       patch 107734-02
