16.SH DESCRIPTION
17.sp
18.LP
19 Functions in this library extract specific identifier, publisher, and attribute
20 information from a system event (sysevent) handle, defined as \fBsysevent_t\fR,
21 and allow privileged user-level applications to queue system events for
22 delivery to the system event daemon, \fBsyseventd\fR(1M).
23.sp
24.LP
25 The \fBlibsysevent\fR interfaces do not work at all in non-global zones.
26.SH INTERFACES
27.sp
28.LP
29 The shared object \fBlibsysevent.so.1\fR provides the public interfaces defined
30 below. See \fBIntro\fR(3) for additional information on shared object
31 interfaces.
