NAME

    rtls -- RealTek Fast Ethernet device driver

SYNOPSIS

    /dev/rtls

DESCRIPTION

    The **rtls** driver provides support for the RealTek 8139 family of Fast Ethernet PCI controllers.

    These devices generally support the standard Fast Ethernet features, including 10BASE-T and 100BASE-TX, both full and half duplex operation, IEEE 802.3 autonegotiation, etc. They also support full size MTUs (1500 bytes), even when used with VLANs.

    The device driver supports the ieee802.3(5) properties, which can be configured with dladm(1M).

FILES

    /dev/rtls Special character device.
